

# Correct disposal of leftover drugs!

The map shows the recommended disposal in your county or city to properly dispose of unused or expired medicines. Several disposal options may be available in your region.

Check for your region at:

[www.arzneimittelsorgung.de](http://www.arzneimittelsorgung.de)

This is how you can dispose of medicines in these counties and cities:

Domestic waste

Mobile hazardous waste unit or recycling centre

Pharmacy

In the county of Göttingen and in Frankenthal (Pfalz), residues of medicines can only be disposed of through pharmacies.

**ENVIRONMENTAL PROTECTION**

To protect water bodies and drinking water, do NOT dispose of pharmaceuticals in the toilet or sink.

If disposed of correctly, the pharmaceutical substances are destroyed by incineration of the waste and no longer pose a threat to the environment.
